

Metallographic analysis microscopes

1. Nikon - Eclipse MA100

The main technical characteristics of the system:

- XY working stroke of 50 x 50 mm;
- Maximum workpiece weight of 5 Kg;
- Maximum image magnification 100 x.

Services offered:

Metallurgy, metal processing, surface examination, cast iron nodularity and composition analysis, grain size, telescopic optics, etc.

2. Mitutoyo 176-809A

The main technical characteristics of the system:

- XY work table stroke of 100 x 50 mm;
- Work table size: 240 x 152 mm;
- Maximum workpiece weight of 5 Kg;
- Maximum workpiece height of 107 mm;
- Maximum image magnification 30 x.

Services offered:

Metallurgy, metal processing, dimensional control, etc.
